

Internship Clearing Market Infrastructure

For our Branch in Frankfurt am Main, on a three to six months basis.

We are a leading global player, clearing 16 million traders per day across 85 exchanges worldwide. We offer an integrated, modular package of direct market access, clearing and custody services. The range of services available through our international network caters not only for traditional products such as stocks, bonds, futures and options (both listed and OTC), but also for energy, commodities, carbon allowances, warrants, forex and many other financial instruments.
